

# AMRUT NANO WATER CONDITIONER (SCALE GUARD)

is unique design accomplishes one of nature's greatest miracles of regeneration and renewal by mimicking the natural spiraling motions and hydrological Cycle of water. It create the water into the Structured Water. Which is now a day latest technology by in term of the nature it is purely Natural Cycle of the water.

# What is the Water Structure Science:-

In the world of water purification structured water is water that has been purified energetically in order to neutralize toxins and create balanced water. Water in nature is usually structured. That's where the inspiration for most water structuring devices comes from. As water runs through nature, it spins around corners and curves and this spinning creates a vortex, which structures the water.

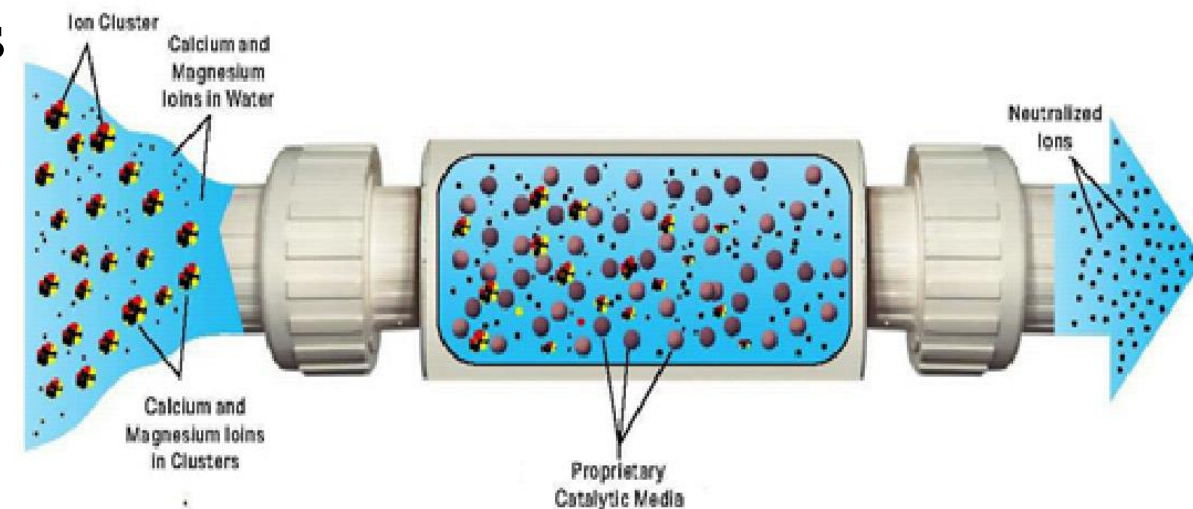

# AMRUT NANO WATER CONDITIONER (SCALE GUARD)

By AMRUT FILTRATION Technologies is a new technology for water treatment that utilizes nature's own methods, producing cleaner, softer, smoother water without the use of chemicals, filters, salts, electricity or complex metal alloys for a truly maintenance-free water conditioning system. It also cleans the memory of water! This new technology employs an innovative application and advanced understanding of the vortex phenomenon utilizing the dynamic characteristic of water itself to create a "fluid machine" that works at the molecular level.

# How AMRUT Nano Water Conditioner (Scale Guard) Work?

- AMRUT Nano Water Conditioner (Scale Guard) In line unit that water goes through this it spins in a very fast way & create centripetal & centrifugal. Our Nano Scale guard inside structured has been well Designed where spheres placed in geometric formation & generates Vortex & inside Chamber are Comprised of Special & rare Material of the earth which is helps to Generate Electro magnetic field.
- Due to Vortex in the water & Electro magnetic field re generate the water Structure & get back natural water structure in Hexagonal Form.
- Lime Scale is in Sticky form which this device is cluster the molecules of the water & Change the lime scale in the non sticky form.

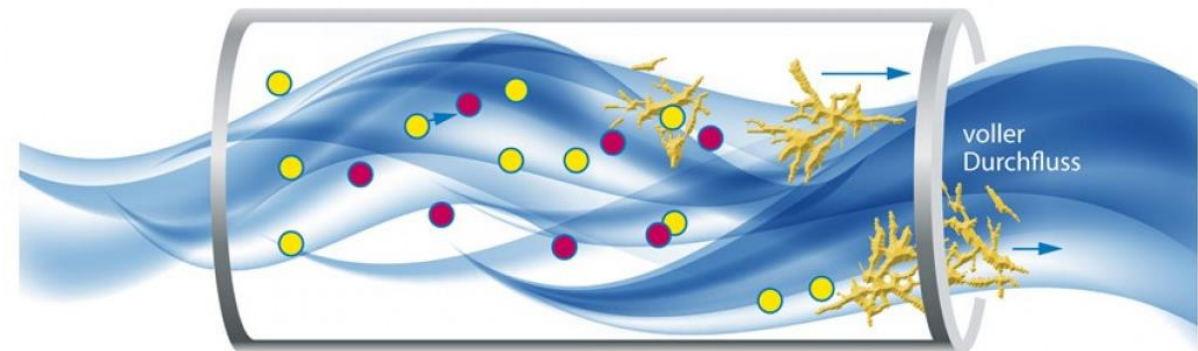

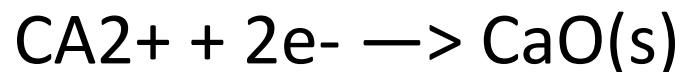

# What Does AMRUT Nano Water Conditioner (Scale Guard)?

- AMRUT Water Conditioner Nano Scale Guard inside design is generating vortex so flows water 360 degree & generate the Electro magnetic Field with help of the special material & cluster the water in naturalized form in to the Hexagonal pattern which removes Have metals; gases; Chemical like chorines & soften the water. Inside the spiral chamber help to cluster the this types molecules of the water. As the water moves through the chamber a services of temperature & pressure Fluctuation occurs within the water. The water also has more available oxygen, increased hydration and supports enhanced nutrient absorption.

- The Chemical process occurs is

# The analysis & Lab results:

The sample has achieved a water quality level that is normally only to be found in high-quality natural spring water. In comparison with the neutral sample, or other comparable tap water, it definitely shows a considerable improvement in quality. The sample was evaluated with the grade of 1.8 and the result was Good with a tendency to Very Good. This demonstrates a very clear advantage for the consumer when using this device. Device received results in Hot temperature Countries within 3 month & in Cold temperature countries within 6 months.

We at AMRUT FILTRATION have the ultimate solutions to all hard water problems faced in various fields. This is efficient, effective water structuring, energizing device since it is a natural water softener and maintenance free.

# Benefits of the AMRUT Nano Water Conditioner (Scale Guard)

## → DOMESTIC USE

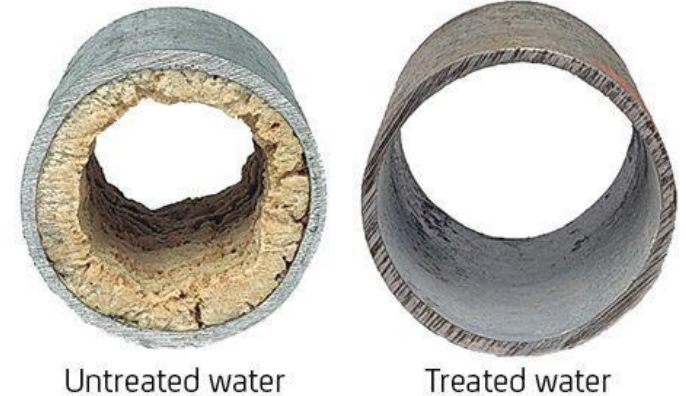

- Scalling do not form on the other hand it descales.
- No corrosion of taps.
- Fresh tasting invigorating water.
- Wonderful showers and baths – no chlorine smell.
- No more dry itchy skin.
- More lather hence Less soaps and detergents used.
- Hair and skin rinses cleaner and feels better.

## → INDUSTRIAL USAGES

- When fixed to STP or ETP the smell is reduced
- No Scale Formation corrosion Reduced.
- Better heat absorption, hence a better coolant.
- Better lawn and plants in the campus.
- Best solution at the AC coolant towers.
- Huge savings as outsourced water is not wasted during regeneration.

Whether you intend to use structured water for residential purposes or structured water for agriculture uses, it can offer a wide range of benefits. When structured water enters our bodies, it raises the energy levels, helps in digestion, allows us to benefit from enzymes that can assist with nutrient absorption, boost our concentration power, work on muscle contractions, regulates cholesterol and blood pressure levels and improves respiration.
